

# Enhancing National Climate Services (ENACTS)

**ENACTS is designed to transform local, national and regional climate-sensitive development decisions through the widespread uptake of timely, relevant, locally enhanced and quality assured climate information at relevant spatial and temporal scales.**

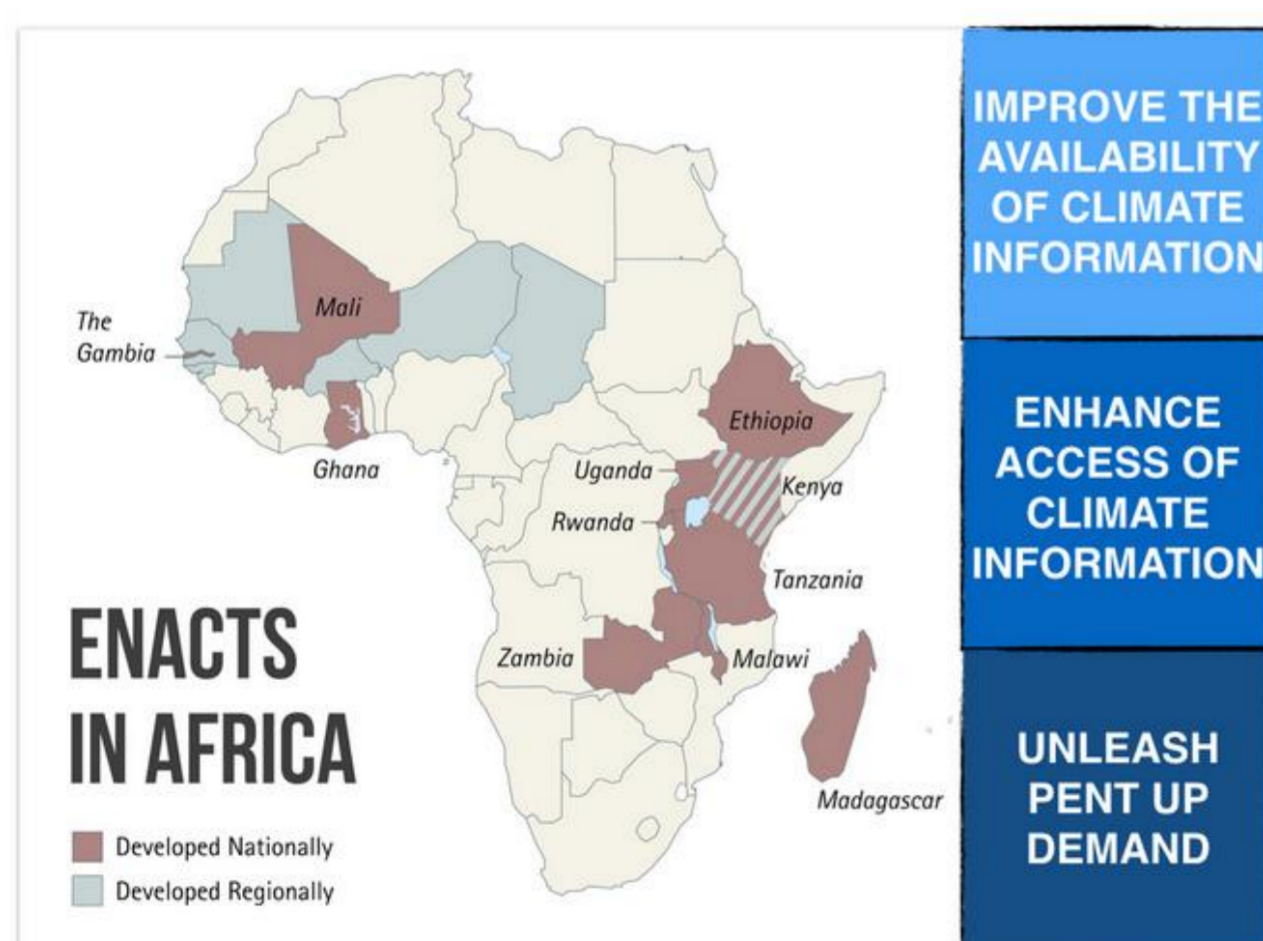

The ENACTS initiative is led by the International Research Institute for Climate and Society (IRI). IRI are working in partnership with CARE Adaptation Learning Programme (ALP), the Columbia Data Science Institute and others to follow the impact of the 2015 El Niño in order to assess the strengths and weaknesses of the communication of the event, its potential impact and the responses.

# ENACTS

## ENHANCING NATIONAL CLIMATE SERVICES

### WISER funding to develop the ENACTS initiative

WISER funding has been allocated to IRI to develop the ENACTS initiative in two new countries, Uganda and Kenya, and to strengthen the initiative in countries where it has already been implemented (Ethiopia, Tanzania and Rwanda).
